New York Stock Market

New York, October 29.—After several days of comparative calm, to-day's stock market was subjected to another wave of liquidation and a series of hear attacks, which sent prices to the lowest level of the current movement. The selling derived much of its impetus from conditions abroad, where most markets continued to manifest considerable apprehension.

Undoubtedly, however, the decline was materially assisted by the aggressive attitude of a hearish faction here, which has become emboldened, not only by the tension across the water, but by such home factors as money and politics.

Canadian Facific was weakest of the

and politics.

Canadian Pacific was weakest of the international group, declining over two points in London before our opening. Its maximum decline here was seven points, from which it made but

seven points, from which it made but slight recovery.

The settlements in London progressed without great strain, although a failure of some importance occurred at that centre. Reading and Amalgamated Copper also were singled out for short selling, and other coppers reflected the change which is said to have come over the condition of that industry. United States Steel, too, was the object of extensive bear sales, with industry. United States Steel, too, was the object of extensive bear sales, with resultant substantial declines. The statement of the Steel Corporation for the third quarter of the year, issued after the close of the market, disclosed total earnings of \$20,177,465, compared with \$25,102,265 and \$18,429,294 in the preceding quarter. The statement by months shows that August business was vastly better than that of July and slightly better than September. Bonds were lower, but relatively stronger than stocks.

New York, October 29.—Money on call strong, 4 3-4@5 3-4; ruling rate, 5 1-2; closing bid, 4 3-4, offered at 5 per cent. Time loans strong; sixty

RAILROAD BONDS.

New Orleans, October 29.—Cotton futures opened steady, 2 points down to 1 point up compared with the last prices of the previous day. The close was steady at a net advance of 12811 points. Cables were about as due. The weather map was extremely favorable, as dry, clear and warm weather was shown all over the cotton region. Some selling was caused by this, but it was offset by buying, based on reports of a good spot demand and the attitude of large traders who appeared to be quietly buying. Cables from Liverpool and Manchester was very buillish. Some cables claimed that apinners have sold their output far ahead. In this country it was that spinners were calling cotton. In the afternoon prices at their highest were 18619 points up. Longs took profits at this level and checked the advance. Spot cotton steady, sic. up; middling, Il 11-16c. Sales on the spot 630 baies and 600 to arrive. Closing futures: October, 11.30, January, 11.11; March, 11.35, May, 11.40; July, 11.50.
